

Ederlyn M. Tanangco

Data Scientist

Arlington, VA | 703.409.4141 | Ltanangco8@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Psychologist turned data scientist with a key interest in analyzing data for public good. I'm inspired to help improve public access to healthcare by pairing data insights with innovative tools and technologies in a team setting.

SKILLS

- **Programming Languages:** Python
- **Machine Learning & Libraries:** Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, Natural Language Processing, Statistical Analysis
- **Analytical Tools:** Jupyter Notebook, Microsoft Excel, VS Code, Git, GitHub

EXPERIENCE

Data Science Immersive | General Assembly | Washington, D.C. | Mar 2020–June 2020

Applied skills in computer programming and statistics in a 12 week full-time course. Developed a portfolio of projects:

- **Beer Recommender Application:** Dataset was taken from Kaggle and was cleaned. Performed Exploratory Data Analysis, used clustering methods such as, KMeans and DBSCAN. Evaluated the model using K-Nearest Neighbors. Produced an application that returned similar beers to users using the Scikit-learn library's Pairwise Distances & Cosine Similarity.
- **Client Project:** Scraped Twitter using a wrapper specifically for Twitter. Pulled 60k posts with relevant keywords to "coronavirus" and "executive orders." Completed a sentiment analysis on the posts that were pulled.
- **Web API & NLP:** Scraped the Reddit website using the Reddit Pushshift.io API. Pulled keywords relating to "food" and "health" to see which keyword would be most beneficial to market when conceptualizing an application for development. Completed Natural Language Processing (NLP) to clean and process the data. Models used: Multinomial Naive Bayes, pipelined with Logistic Regression, Tfidf with CountVectorizer to model.

All Plumbing, Inc. | Arlington, VA | Aug 2007–Feb 2020

Operations Manager

- Led a team of 6 in the coordination and procurement of a fleet of 25 vehicles
- Integrated the main customer server system from Servicom to FieldEdge with the IT team. This system mainstreamed invoicing and work-order tickets, making it easier for our staff to collect for payment onsite. This system increased productivity and efficiency for the company.

Marketing Manager

- Managed the company website development and maintenance, working with software developers to ensure a responsive, up-to-date site which properly marketed the company. SEO and site improvements generated 50,000 online impressions, leading to 60–85 unique calls per month.

UI/UX Intern | General Service Administration | Washington, D.C. | Feb–May 2014

- Conducted research on UX/UI materials to prepare government websites for the transition to responsive mobile and desktop sites.
- Conducted wireframing research on approximately 50 randomly selected individuals.
- Presented user-related research ideas for improving mobile website testing, to increase efficiency and usability. Presented research found on each government website that was moving towards mobile web integration and responsiveness.

EDUCATION

General Assembly, Data Science Immersive | Washington, D.C | March 2020–June 2020

George Mason University | B.S. Psychology | Fairfax, VA | Jan 2010–May 2014
